

Adjustable Keyboard Platforms — SOLO ARMS

SECTION 2.3

STANDARD RANGE ARMS

Our collection of standard range arms are designed for use with virtually any Workrite keyboard platform. The adjustable arms allow keyboard trays to be stored under the worksurface when not in use and feature single knob or our one touch Lift-N-Lock height adjustment technology.

All standard range arms feature:

- Tilt range: -15° to +10° as required by BIFMA
- Independent height and angle controls
- Height range from flush to 6" below worksurface
- 360° swivel for easy positioning and storage
- Non-intrusive low profile track provides maximum knee clearance

EXTENDED RANGE ARMS

Our extended range arms offer the same high quality features and performance as our standard range arms with the added benefit of extended reach. Their extended range allows for a broader range of ergonomic placement and greater levels of adjustability making them a great option for almost any application.

Pinnacle 2-Extended

This version of Pinnacle 2 provides 2.5" additional reach and extends 8.5" below worksurface. Available in 17", 22" and 28" versions.

Gemini Arms

Gemini's dual adjustable arms lift larger keyboard surfaces with strength and stability. They are available in two height ranges and in 5 widths from 20"-39". The Gemini Arm height is easily adjusted with T-pull handle and the keyboard surface tilts -15° to +15°.
